BANDARU RAVI KIRAN

AZURE DATA ENGINEER | 4 YEARS OF EXPERIENCE

ravibandaru2114@gmail.com| +91 8074816480 | Mumbai, India | www.linkedin.com/in/ravikiran-b-a02570128

PROFESSIONAL SUMMARY

SQL Developer and Data Engineer 4 years of experience in designing, developing, and supporting cloud-based data engineering solutions on Microsoft Azure. Hands-on experience with Azure Data Factory (ADF), Azure Data Lake Storage Gen2, Azure SQL Database, Azure Databricks, PySpark, Python, Delta Lake, and Microsoft Fabric. Experienced in building scalable ETL/ELT pipelines, data ingestion and transformation workflows, dimensional data models, and Medallion architecture. Strong understanding of batch and real-time data processing, data quality, schema evolution, security, and production troubleshooting.

TECHNICAL SKILLS

Cloud & Azure: Microsoft Azure, Azure Data Factory, ADLS Gen2, Azure Storage, Azure SQL Database, Azure Key Vault, Entra ID, Service Principals, Managed Identities, REST APIs

Databricks & Spark: Azure Databricks, Apache Spark, PySpark, Spark SQL, DataFrames, RDDs, Delta Lake, Unity Catalog, Spark UI

Programming: Python, SQL, NumPy, Pandas

Data Engineering: ETL/ELT, Batch Processing, Real-Time Pipelines, Data Ingestion, Data Transformation, Data Lineage, Schema Evolution

Data Modeling: OLTP/OLAP, Data Warehouse, Data Lake, Data Mart, Fact & Dimension Tables, SCD, Star Schema, Snowflake Schema

Architecture: Medallion Architecture, Bronze/Silver/Gold Layers, End-to-End Data Pipelines, Scalable Data Workflows

Microsoft Fabric: Fabric Data Ingestion, Dataflows Gen2, Lakehouse, Data Warehouse, Semantic Models, Real-Time Intelligence

Orchestration & Streaming: Apache Airflow, DAGs, Operators, Scheduling, Apache Kafka, Producers, Consumers, Topics

Additional: Snowflake, Snowflake Cortex AI, Tableau/Power BI integration, RAG data pipelines, Vector Databases, Unstructured Data Processing.

PROFESSIONAL EXPERIENCE

Dr. Batra's Positive Health Clinic Pvt. Ltd., Mumbai — Sep 2022 – Till Date

Azure Data Engineer | 4 Years

- Designed and developed Azure-based data pipelines using Azure Data Factory to ingest, transform, and load data from relational, file-based, and API sources into cloud data platforms.
- Worked with Azure Data Lake Storage Gen2 and Azure Storage services for structured, semi-structured, and unstructured data ingestion and storage.
- Created and maintained ADF Linked Services, Datasets, Integration Runtime configurations, pipeline activities, parameters, triggers, and reusable ETL workflows.
- Implemented data transformation and large-scale processing using Azure Databricks, Apache Spark, PySpark, Spark SQL, joins, aggregations, and window functions.
- Worked with Delta Lake and implemented Medallion Architecture using Bronze, Silver, and Gold layers for reliable and scalable data processing.
- Developed Python and PySpark scripts for data cleansing, validation, transformation, deduplication, and business-rule implementation.
- Designed data warehouse models using fact and dimension tables, Star/Snowflake schemas, and Slowly Changing Dimensions (SCD) concepts.
- Worked with Azure SQL Database for relational data storage, SQL development, data validation, and downstream reporting/analytics requirements.

- Integrated Azure Key Vault with data pipelines for secure management of secrets and credentials, and worked with Entra ID, Service Principals, and Managed Identities for secure access.
- Worked with REST APIs for data ingestion and service integration, including handling API-based source data in automated pipelines.
- Implemented data lineage, schema evolution, data quality checks, and error-handling approaches across data workflows.
- Supported batch and near-real-time data processing patterns and developed an understanding of Kafka-based producer, consumer, and topic workflows.
- Worked with Microsoft Fabric concepts including Lakehouse, Data Warehouse, Dataflows Gen2, data ingestion, semantic models, and Real-Time Intelligence.
- Performed pipeline monitoring, troubleshooting, performance analysis, and production support to resolve data processing failures and maintain reliable data delivery.

EDUCATION

Bachelor's Degree — Acharya Nagarjuna University | 89%

KEY STRENGTHS

- End-to-end Azure data pipeline development and production support
- Strong SQL, Python, PySpark, ETL/ELT, and data modeling fundamentals
- Scalable data lake and lakehouse architecture using ADLS Gen2, Databricks, Delta Lake, and Microsoft Fabric
- Data security using Entra ID, Service Principals, Managed Identities, and Azure Key Vault
- Troubleshooting, performance optimization, data quality, and schema evolution

ATS KEYWORDS

Azure Data Engineer, Azure Data Factory, ADF, ADLS Gen2, Azure SQL, Azure Databricks, PySpark, Python, SQL, Spark SQL, Delta Lake, Medallion Architecture, Microsoft Fabric, Lakehouse, Data Warehouse, ETL, ELT, Data Pipeline, Data Modeling, SCD, Star Schema, Snowflake Schema, Azure Key Vault, Entra ID, Managed Identity, Service Principal, REST API, Airflow, Kafka, Snowflake, Data Governance, Unity Catalog, Batch Processing, Real-Time Data
